

# **MVC 5**

## **(Model-View-Controller)**

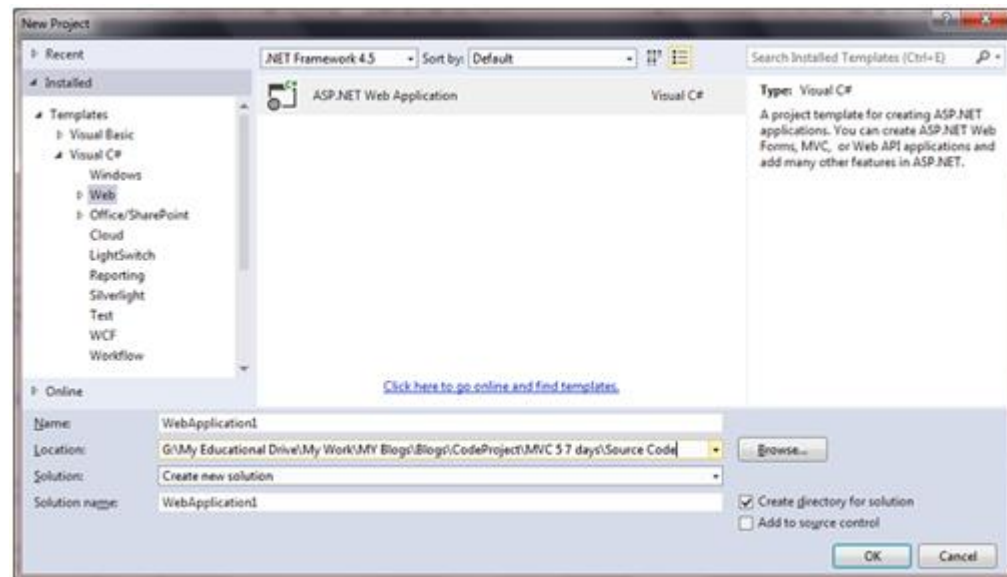

### **Kreiranje projekta i objekata**

# Kreiranje projekta

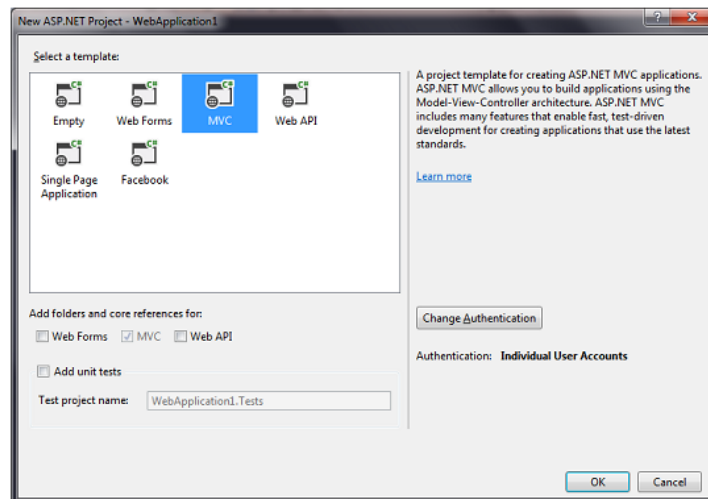

## 1. File -> New -> Project

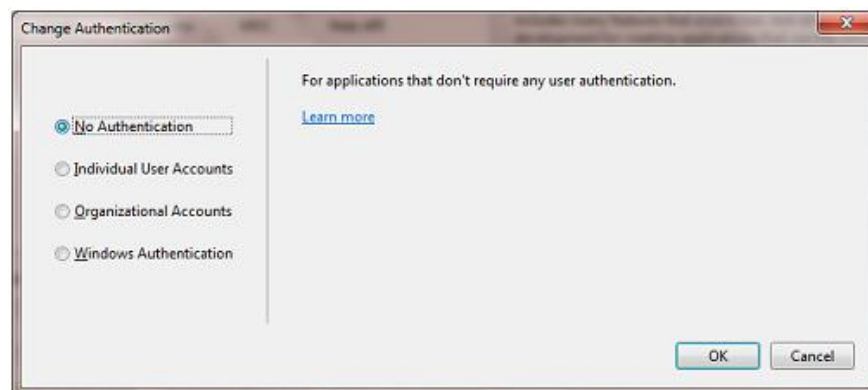

## 2. Odaberite ASP.NET Web Application

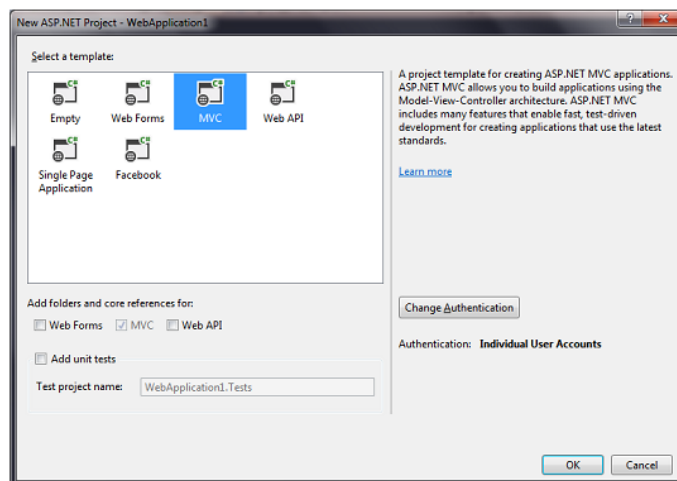

## 3. Odaberite MVC

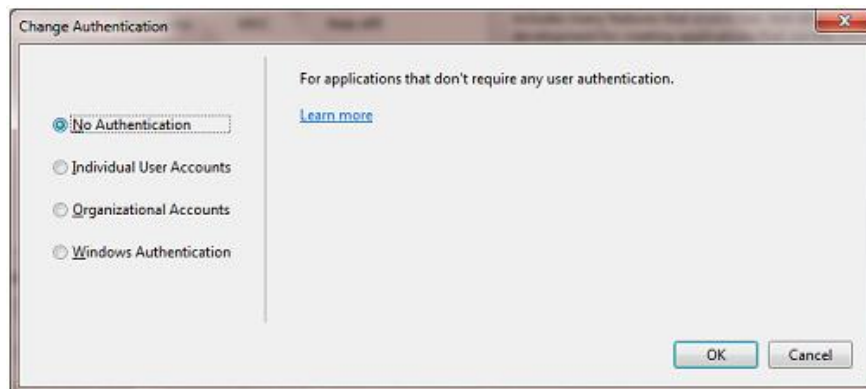

## 4. Odaberite - No Authentication

## 3. Odaberite MVC

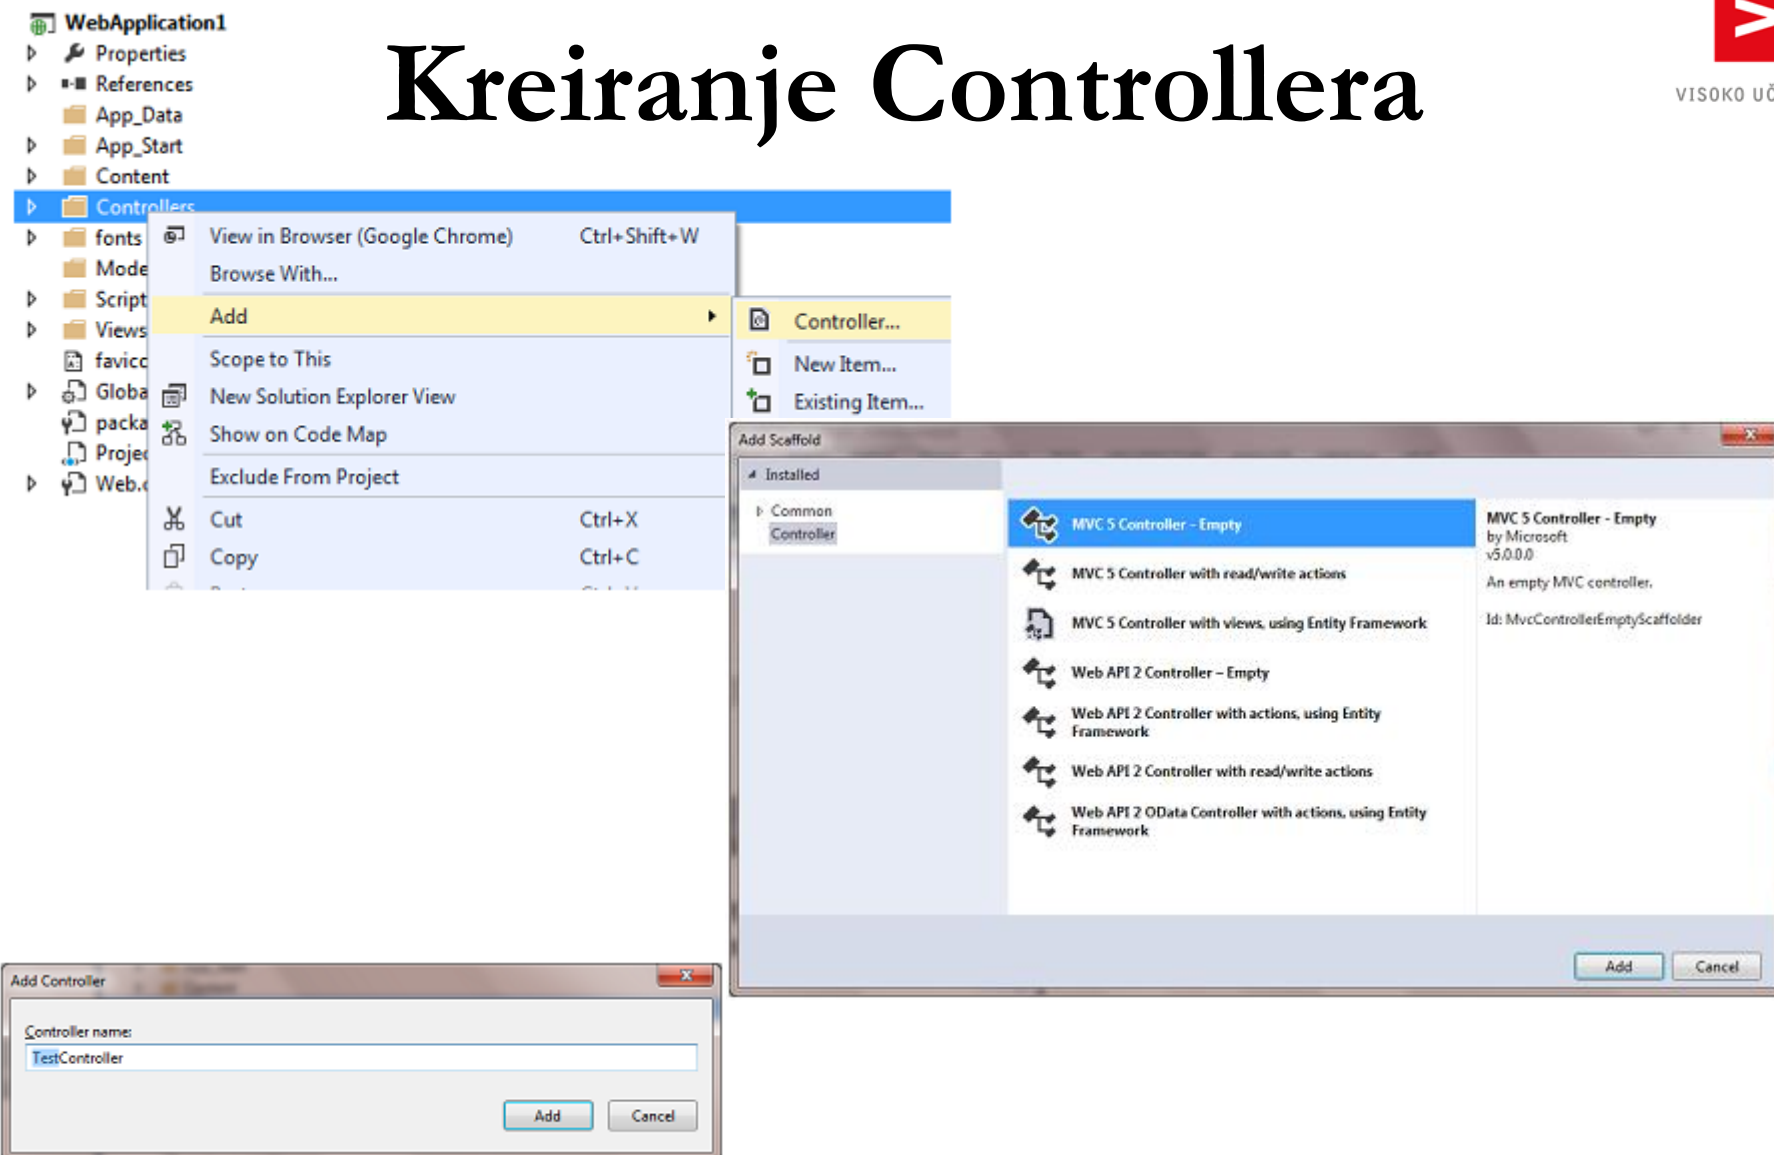

## 4. Odaberite - No Authentication

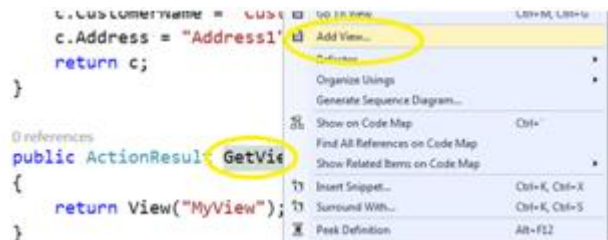

# Kreiranje glavnih objekata

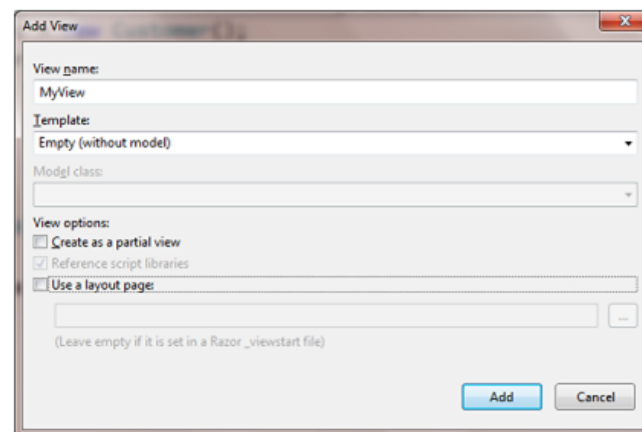

# Kreiranje Controllera

1.

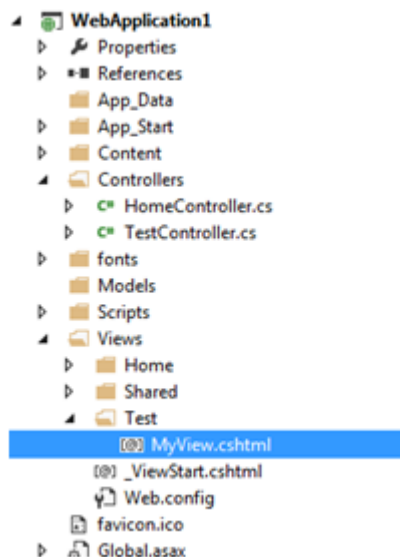

=&gt;

# Kreiranje Viewa

2.

=&gt;

```

@{
    Layout = null;
}
<!DOCTYPE html>
<html>
<head>
<meta name="viewport" content="width=device-width" />
<title>MyView</title>
</head>
<body>

```

# Dijeljeni View-ovi

Unutar direktorija Shared se kreiraju View-ovi koje koristi cijela aplikacija:
